TECHNICAL SKILLS

HTML / CSS / JavaScript	ReactJs	NextJs / ExpressJs
MS SQL	Redux / Zustand	React Query / GraphQL
Typescript	Socket IO	React Hook Form
Bootstrap / Material UI	Performance Optimization	Responsive Design
Tailwind CSS / Sass CSS	Prompt Engineer	

TOOLS USED BY ME

VS Code / Cursor AI	Chat GPT / Claude AI	Google Studio AI
Github	Google Antigravity	Jira Atlassian / Jenkins

PROFESSIONAL EXPERIENCE

Software Developer, Yudiz Solutions Ltd. July 2022 - Present

- Delivered Projects on time and **increased fast productivity** by using **AI Prompting**.
- Collaborated with Backend teams and Product Managers using **Agile practices**.
- Designed** new modern UI **Admin Software** from the scratch to dynamic components using **Material UI Components**.
- Took **training sessions** of **ReactJs** by sharing technical + practical knowledge to my Juniors.

ReactJS Intern, Yudiz Solutions Ltd. July 2022 - Dec 2022

- Learned **JS core concepts** and coding standards to write production-ready code.
- Explored **ReactJs, Webpack, React Query, GraphQL** and **NextJs** during my training.
- Experienced working on live projects** for few modules code integration.

PROJECTS

Grid Master Live | ReactJs, Socket IO, Payment Gateway

- Developed a real-time **Formula1** car gaming platform available in Android/iOS **mobile apps (via WebView)**, enabling users to play **Head-to-Head Reaction Challenge** or can build there F1 fantasy team for **Fantasy Gaming**
- Implemented **Socket.io** for **Head-to-Head Reaction Challenge**, The world's first multiplayer F1 start reaction game. Race your **reflexes against other fans in real time**.
- Developed the application **end-to-end from scratch**, implementing pixel-perfect, modern UI/UX based on high-quality **Figma designs** from the design team.

Saudi Game | NextJs, Socket IO, i18n, Payment Gateway, Agora Voice Chat

- Developed a real-time quiz gaming platform available as a **web application** and Android/iOS **mobile apps (via WebView)**, enabling users to play quizzes across multiple categories such as entertainment, general knowledge and many more.
- Implemented **Solo Game** and **Private Room** multiplayer modes, supporting **audio, video, and image** based questions for interactive gameplay.
- Integrated **i18n** for **Arabic and English** localization and implemented **MyFatoorah payment gateway** for in-app transactions.

Betdetroit Poker | ReactJs, Material UI, React Query, React Hook Form

- Developed a **feature-rich Admin Panel** for the **Betdetroit Poker mobile game**, supporting multiple game modes including **Bullfight, Blackjack, Lucky Table, Casino, and Championship**.
- Built the **Admin Panel** from scratch using a **feature-based** folder architecture, implementing **reusable components, custom React hooks, and scalable state management**.
- Implemented comprehensive management modules including **Game Management, Game History, Global Settings, Spin Wheel, Daily Rewards, Tasks, VIP Management, and Club** features

IJOPT | NextJs, SEO, API Routes

- Developed a **SEO-optimized academic journal platform** using Next.js, enabling **researchers and authors to browse, submit, and manage research articles** online.
- Implemented **dynamic routing** to improve **SEO performance** and ensure fast page loading for journal issues and articles.
- Built a **responsive user interface** and **article submission workflow**, providing seamless navigation for authors, reviewers, and readers.

RFOX Metaverse | ReactJs, Webpack, Metamask Wallet, Socket IO

- **Worked dedicatedly** on the **RFOX Metaverse project**, contributing to interactive web applications such as **Last Meme Standing** and **virtual hub experiences software** using **React.js and Webpack**.
- Implemented **Metamask authentication** for **Web3 wallet login** and developed responsive UI components optimized for smooth user interaction within the metaverse environment.
- Collaborated directly with the **client, attending Sprint meetings, gathering requirements, and ensuring timely delivery** of project features.

Runaway Jones | ReactJs, Material UI, React Hook Form

- Developed the **Admin Panel from scratch** for the **mobile endless runner game** Runaway Jones, enabling administrators to manage core game operations and analytics.
- Implemented multiple management modules including **User Management, Shop Management, Tournament Management, Tournament Tickets, and Tournament Leaderboards**.
- Built advanced admin features such as **Overall Leaderboard Statistics, Global Settings configuration, and game data controls** to streamline game administration and monitoring.

Chaupal MGP | ReactJs, Material UI, React Hook Form, React Chart

- Contributed to the **Chaupal MGP multi game platform** with **role based management**, which hosts popular games such as **Ludo, Poker, Teen Patti, Call Break**, and their multiple **gameplay variants**.
- Developed and enhanced the **Admin Panel** for the **Teen Patti game**, enabling efficient management of gameplay data and platform operations.
- Implemented **dashboard modules for revenue tracking, analytics, and user statistics**, helping administrators monitor platform performance and user engagement.

TechyRoo | ReactJs, Material UI, React Hook Form

- Developed a **role-based admin panel** for the **TechyRoo platform** supporting **Super Admin, School Admin, and Teacher Admin**, enabling efficient management of **schools, classes, teachers, parents, and students**.
- Implemented a **feature-based folder architecture** for the admin panel, improving code scalability, maintainability, and modular development across multiple management modules.

QUALIFICATION

B.E. in Computer Engineering

2019 - 2023

Darshan Institute of Engineering and Technology, Rajkot

CGPA: **8.70**
